VertexFX Client Help

This is an easy and friendly supporting Help which is an HTML based on-line help. This Help allows you to concentrate on whatever part of the Client you need to learn about by automatically laying out generated topics in a consistent and professional style.

Getting Started

The easiest way to find out whatever you need to know about the smallest details in the Client side is.

Either to:

Select the part of the Client Window you want to learn about and press **F1**, then the Help window will open to you with the specific topic you desired.

Or:

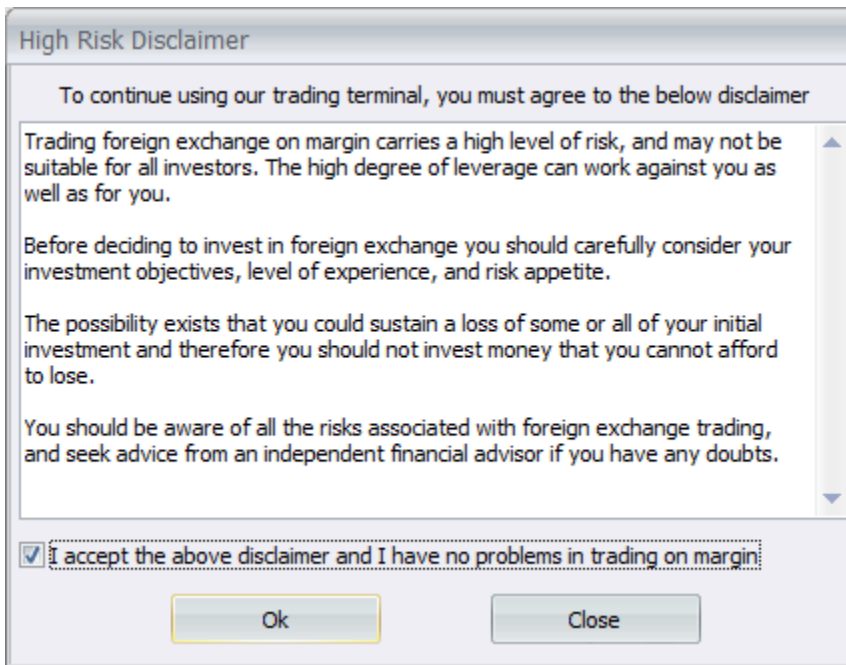

Go to the **Help Menu** at the Menu bar and choose **Help Topics (F1)**, when the Help window appears to you, at the lower side of it there are the index links, and by clicking on the desired topic it will open for you.

When the Help window appears to you, you can go to the search tab and type-in the topic you want to know about in the text field then press Enter. So that all topics related to the word(s) you typed-in are listed and you can choose whichever most suites what you are looking for.

Panels & Toolbars

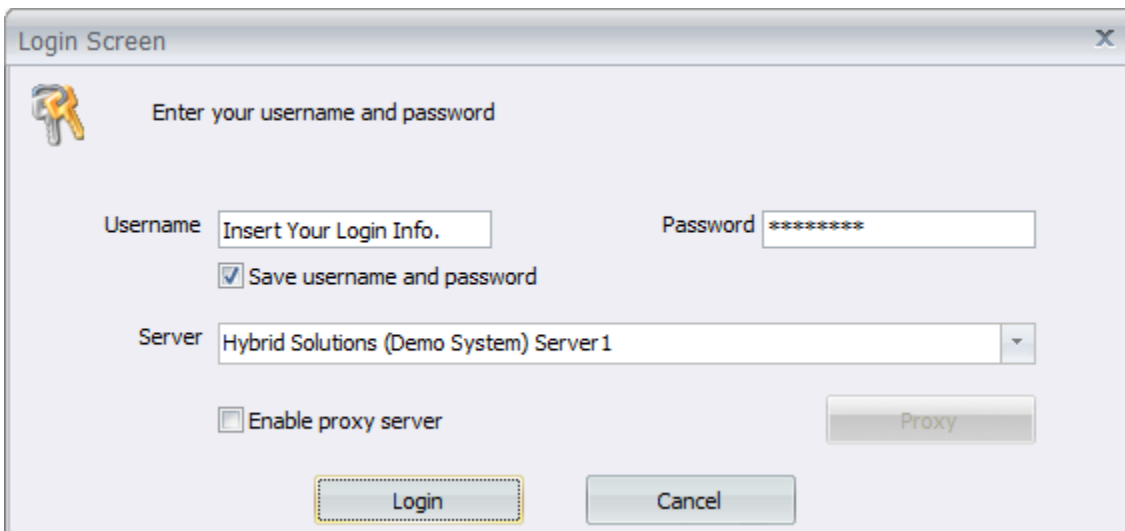

Log on to the system

- When you open the VertexFX Platform, it is required from you to accept the Disclaimer message. If you don't accept the Disclaimer message, you will be connected as a read only user, if you press "Close" your connection will disconnect.

- You can log in to client terminal by:
 - 1- Choosing the start bubble  from the upper left corner and choose login .
 - 2- You may go to the toolbar and select the Home option then go to the Administration tab and choose login .
 - 3- Another way is by going to the Quick Access ToolBar on the top left corner  and choose login .
 - 4- You can also easily login to the client platform by pressing **Ctrl + L**.
 - 5- Also double click on the  in the right bottom corner will open for you the logon window.

- After that a small window appears to you, fill-in the valid user name and password given to you by your market maker.
- You can click on the check box: Save username and password, so you wouldn't have to type your username and password every time you log on.
- **Server:** This term developed to specify the server you connecting through and it will be useful when you have a Backup Server to switch your connection to it when you are facing disconnection case with the main server, it requires to select the backup server, or fill server IP and Port number as the following format (IP:Port).
- If you are connecting through Proxy, make sure the option "**enable proxy server**" is checked.
- The proxy button will be activated and by clicking on it you will access the proxy server window and configure your proxy.

Connection Status:

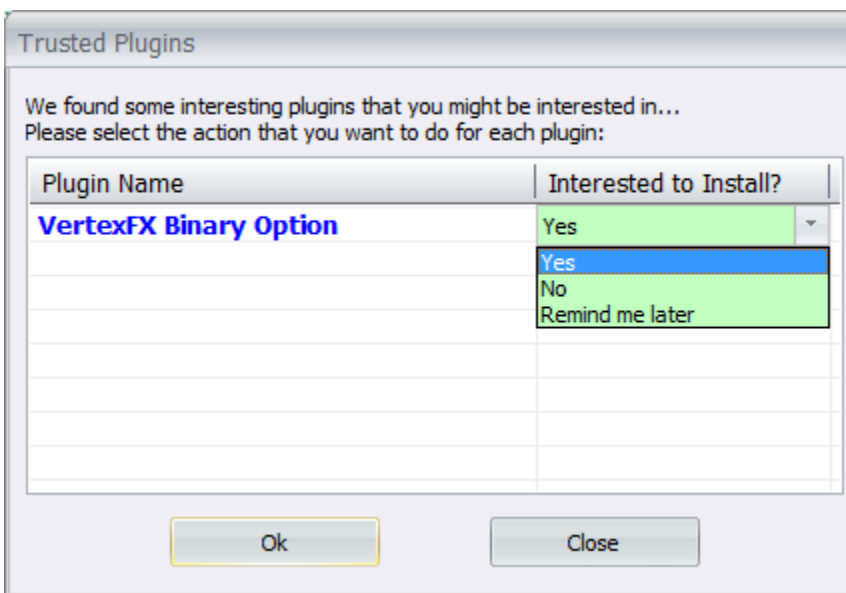

- After filling all the blanks and pressing on the login button, the terminal will be connecting to the server **Connecting..**  **Disconnected**.
- If your login information is correct the system will be connected but in waiting mode **Waiting..**  **Connected** till all the data are loaded.
- When the waiting mode finishes, you will be officially connected to the system  **Connected** and you are ready to use it.

Trusted Plugins

- After you are logged to the system you can check some trusted plugins in VertexFX from the following pop-up message:

- Click on "Check Plugins" and the following window will appear:

- If you perform a double click on the desired plugin, the related plugin link will in [vStore](#) area to install it.
- After you install the plugin, you will find it under the Plugin Toolbar.

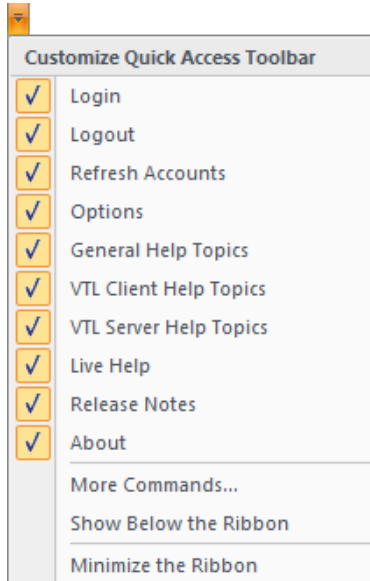

Quick Access Toolbar:

Contains the following options:

- Login  to connect to the system.
- Logout  to disconnect from the system.
- Refresh Accounts  to refresh the [accounts tree](#).
- System Options  to open the [system options](#) window.

- 

[Login](#) opens the login window.
- 

Logout to log out from the terminal.

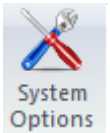

- Change Password  opens a small window to change the user password after inserting the old password.

- Refresh Accounts  to refresh the accounts tree on your platform.

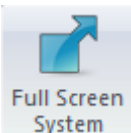

- Send Mail  opens a small window which allows you to send mails to your accounts if you have multiple accounts in your accounts tree.

3- Options

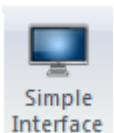

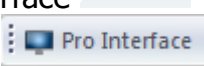

- Mute  to mute all the platform sounds.

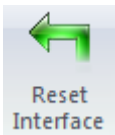

- [System Options](#)  opens a window for the general settings of the platform options.

4- System Interface

- Full Screen System  to switch the platform to full screen mode. If you

want to exit the full screen mode click on this button .

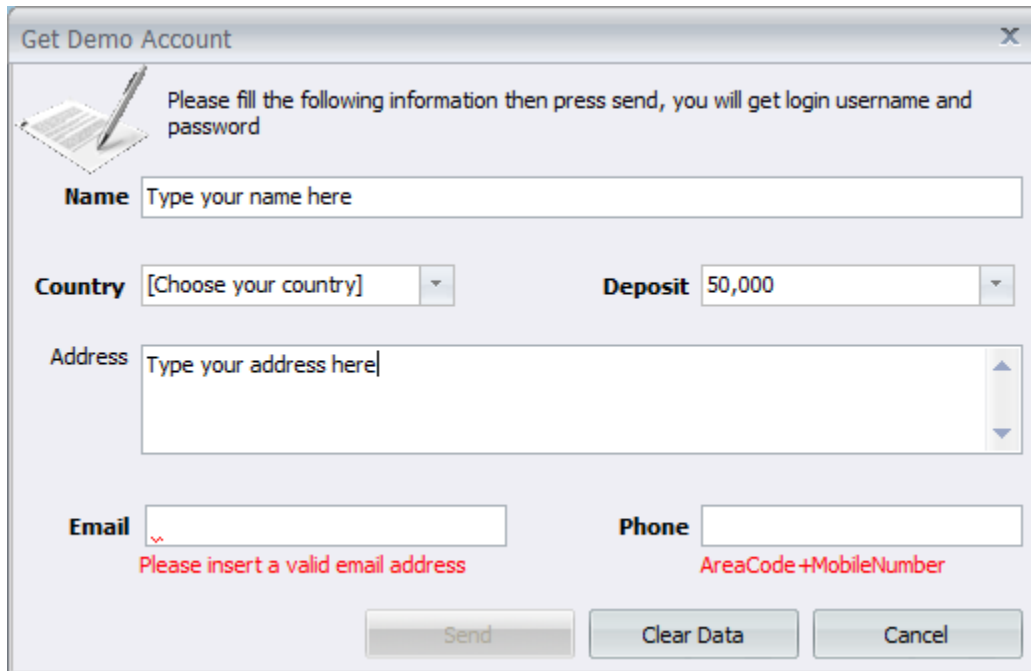

- Simple Interface  to view the platform as simple interface mode. Click on this button  to return you back to the Pro Interface.

- Reset Interface  to reset the platform interface as default.

5- Others

- Open Demo Account opens a new window to create a new demo account after you fill all blanks.

A screenshot of a web form titled "Get Demo Account". The form contains the following fields: "Name" (text input), "Country" (dropdown menu), "Deposit" (dropdown menu with "50,000" selected), "Address" (text area), "Email" (text input with a red error message "Please insert a valid email address"), and "Phone" (text input with a red error message "AreaCode +MobileNumber"). At the bottom, there are three buttons: "Send", "Clear Data", and "Cancel".

Get Demo Account

Please fill the following information then press send, you will get login username and password

Name Type your name here

Country [Choose your country] **Deposit** 50,000

Address Type your address here

Email Please insert a valid email address **Phone** AreaCode +MobileNumber

Send Clear Data Cancel

6- Exit

- Exit System to close the platform.

[Back to Help Index](#)

View Toolbar

This is the View Toolbar which you will be able from here to edit the settings of viewing the platform. It contains three sections as the following:

1- Languages

- The languages button  will open for you a list of languages to switch the platform to the desired language. For sure you will need to restart the platform so the language will take effect.

2- Show /Hide Windows

- Navigator  to show/ hide the [navigator window](#).

- Market Watch  to show/ hide the [market watch window](#).

- Tick Chart  to show/ hide the [tick chart window](#).

- Show All  opens a list of the panels tabs that you can hide/ show them.

- News  to show/ hide the [news panel](#).

- Plugins  to show/ hide the [plugins panel](#).

- Chart to show/ hide the [chart window](#).

Data Window to show/ hide the [data window](#) which shows information (Date, Time, Open, High, Low and Close) for the drawn [chart window](#). This information will be changed depending on the place where the cursor is pointing in the chart window. You can also see the Data Window of the drawn chart in the status bar in the bottom of the chart window.

3- System Interface

- Full Screen System to switch the platform to full screen mode. If you

want to exit the full screen mode click on this button .

- Simple Interface to view the platform as simple interface mode. Click on this button

to return you back to the Pro Interface.

- Reset Interface to reset the platform interface as default look.

- Windows Title Bar to show/ hide the title bar of each window in the terminal.

Charts Toolbar

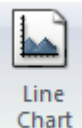

This is the Charts Toolbar which you will be able from here to control the settings of viewing the chart window. It contains eight sections as the following:

1- Price Style

- 

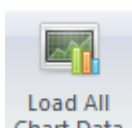

Candlesticks to view the chart candles as sticks in [chart window](#).
- 

Standard Bar to view the chart candles as standard bar in [chart window](#).
- 

Line Chart to view the chart as line in [chart window](#).
- 

Heikin Ashi to view the selected chart price style (Candlesticks, Standard Bar or Line Chart) as Heikin Ashi in [chart window](#).

2- Chart Data

- 

Load All Chart Data to load all data of the chart in chart window from beginning till now.

- **3- Chart Saving**

- Print Chart use this option to print the picture of the chart if your computer is connected to a printer.

- Price History: use this option to show the information of the chart as list.

4- Chart Zooming

- Zoom in to maximize the zooming on the chart window.

- Zoom Out to minimize the zooming on the chart window.

- Period Zoom after selecting this option define the desired period to be zoomed in, by clicking in the starting of the period then another click on the end of the period in the chart window.

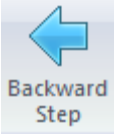

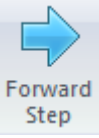

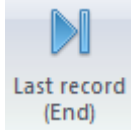

5- Chart Control

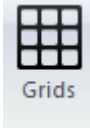

- Chart Shift Use this option to shift the chart away from the beginning of the chart window. After choosing this option a small pointer will show up on the top of the chart window that you can drag it to the desired place in the chart.

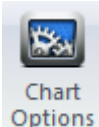

- First record (Home) it drags the chart to the first record in chart history.

- Backward Step  to drags the chart step backward.
- Forward Step  to drags the chart step forward.
- Last record (End)  it drags the chart to the last record in chart history.

6- Show /Hide

- Grids  to show/ hide grids on the chart window.

7- Options

- Chart Options  opens the chart options tab from the [System Options](#) screen, which allows you to edit the settings and colors of the chart window.

[Back to Help Index](#)

Technical Analysis Toolbar

This is the Charts Technical Analysis which contains nine sections:

1- Trade

- New Position to open the [one click trading screen](#) to place a New Position for the drawn symbol [Chart Window](#).
- New Entry Order to place [Limit/Stop order](#) for the drawn symbol [Chart Window](#).

2- Chart Period

| | | |
|-----|-----------------|--------|
| M1 | One Minute | Ctrl+1 |
| M5 | Five Minutes | Ctrl+2 |
| M15 | Fifteen Minutes | Ctrl+3 |
| M30 | Thirty Miutes | Ctrl+4 |
| H1 | One Hour | Ctrl+5 |
| H4 | Four Hours | Ctrl+6 |
| D1 | Daily | Ctrl+7 |
| W1 | Weekly | Ctrl+8 |
| MN | Monthly | Ctrl+9 |

- From here you will be able to change the periodicity of the chart (1, 5, 15, 30 minute, 1, 4 hours, 1 day, 1 week and 1 month).
- For more info please check [Chart Window](#) options.

3- Cursor

- From here you can change the cursor type on the chart to be either cursor or crosshairs.
- By choosing the Crosshairs option, Hold left click and move the cursor to change the reading.
- To save the readings of the Crosshairs on the chart just press right click on the desired point while holding left click.
- Also you can remove all the crosshairs on the chart window, or remove the available crosshairs from the drop down option in the Remove Readings button.
- For more info please check [Chart Window](#) options.

4- Add Object

- From here you can choose any object type (Fibonacci, Line Studies, Channels, Drawings or Symbols and Text) to be added to the chart window.
- Also you can edit or delete the added object(s) to the chart window.
- For more info please check [Chart Window](#) options.

5- Add Indicator

- From here you can choose any indicator type (Oscillators, Trends, Volumes or Custom) to be added to the chart window.
- Also you can edit or delete the added indicator(s) to the chart window.
- Check also each [Technical Indicators](#) functionality.
- For more info please check [Chart Window](#) options.

6- Darvas Boxes

- From here you can display the chart window candles according to Darvas Boxes technique.

7- Templates

- To save or remove the added chart template(s).

8- Full Screen

- To maximize/minimize the chart window.

9- Strategy

- Choosing this option will open the VTL Editor (VertexFX Trading Language Editor) that will be applied to the chart window.
- Know more about the [VTL Client Scripts](#).
- Know more about the [VTL Server Scripts](#).

Tick Chart Toolbar

This is the tick chart toolbar, which contains some options for the tick chart window, and they are as the following:

1- Show/ Hide

- From this part you can show or hide the ask line in the tick chart window.
- Also you can show or hide the grids of the tick chart window.

2-Saving

- From this part you can save the picture of the tick chart window.
- And you can print the tick chart window, if your computer is connected to a printer.
- Also you can show the prices of the tick chart window as list.

3- Clear

- This option allows you to clear the tick chart window data, so it will start updating again with new prices.

Plugins Toolbar

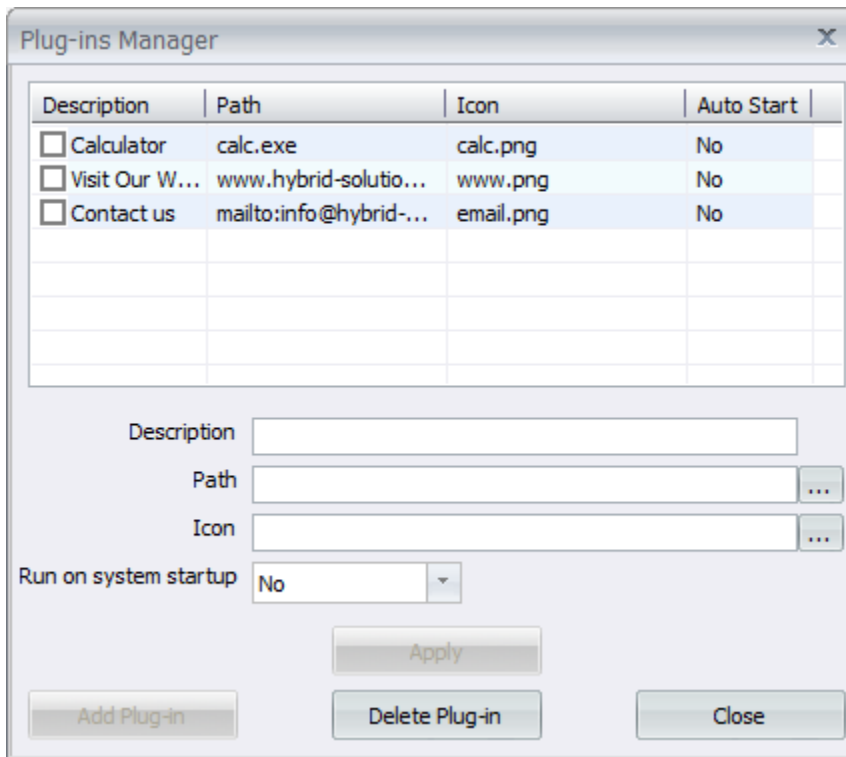

The Plugins Toolbar contains three tools by default (Calculator, Visit Our Website and Contact us), you can also add more plug-ins from this button to make this plugin easy to

access by your terminal by click on

To add a new plug-in press on the Add Plug-in button and the Plug-ins Manager window will open as the following image:

After you fill all the blanks about your new plug in press Add Plug-in then your new application will be showing in the Plugin Toolbar. You will be able to delete an added plug-in also from this window.

If you want to add some of your applications (For example ABC.exe) on the plugins toolbar, you must add a shortcut for this application (ABC.exe) in the following path: C:\ProgramData\VertexFX Plugins.

And if you want to add a specific Icon for this application in the system, you must put an image with the same name as the EXE name (ABC.exe), but the image must be PNG image (ABC.png).

And beside the exe which may be found on the C:\Program Files\..., Assume that the EXE name is ABC.exe, then he must add an image called ABC.png beside this exe, this way he will have a unique icon for his system in the Plugins tab, otherwise, if there is no image, a default image will be added in the Plugins tab.

- The Trade Panel shows all open positions with the details of each opened position:

| Column Name | Description |
|---------------|---|
| Ticket | Shows the ticket ID or order ID for each position on the trade panel |
| Date/ Time | The date and time for each placed position on the trade panel |
| Type | The type (Buy/ Sell) of each position on the trade panel |
| Amount | The amount of each position on the trade panel |
| Symbol | The name of the placed symbol for each position on the trade panel |
| Open Price | The open price for each placed position on the trade panel |
| Current Price | The current closing market price for each placed position on the trade panel |
| S/L | The price of stop loss for each placed position on the trade panel "If this position is managed" |
| T/P | The price of take profit for each placed position on the trade panel "If this position is managed" |
| Commission | If it is set, shows the commission in minus (-) sign for each placed position on the trade panel |
| Interest | If it is set, shows the interest amount for each position on the trade panel |
| P/L | The floating profit or loss for each placed position on the trade panel, and in the bottom of this column you will see the Total Floating Profit/ Loss in bold line |
| Value | The value of the opened position in the current market price, and in the bottom of this column you will see the Total Value |
| Comment | To view the added comment on the Orders/Positions |

- You will notice that the List Item back color for the Pending Order when it is close to Market price by 10 pips is colored with green.
- Also the back color for the Open Position when the Take Profit is close to Market price by 10 pips is colored by green, and the back color when the Stop Loss is close to Market price by 10 pips is colored by red.
- Beside the Trade panel title there is the Positions count and Orders Count on the Trade tab's title.
- At the top of the trade window, you will see the account summary bar for the selected account; this bar will be transferred to red color in case the account reaches the liquidation point. The account summary includes the following:

| Part | Description |
|--------------|---|
| Balance | Real amount of money a client has in his account |
| Flt P/L | The profit or loss the client gains or loses respectively, for all current opened positions |
| Assets Value | The total value of the opened position in the current market price |
| Credit | An amount of money put to the account of a certain client in order to be paid later (like a debt). |
| Equity | Balance + Flt P/L + Credit |
| Used Margin | Called also the Margin Requirement, which is the amount of money that can client afford in his account to buy 1 lot of a certain currency, as example... which takes (-1000) Off for each 1 lot, means 100\$ for each 0.1 lot. |
| Free Margin | Called also Effective Margin, which is equal Equity + Margin Req.(Minus value indicates possible danger and closeness to Liquidation). It means how many lots of a certain currency can client buy with the money which he actually has |
| Margin Level | This equal to $(\text{Equity}/\text{Margin Req.}) * 100\%$ (the bigger number, the better), it is the most important value that both the client and the market maker should keep on watching, because, depending on its value, it can be decided how many lots the client can buy with the money left with him/her, and if the account is close to Liquidation point. If it was 100.00% or more, the account is on the safe side, if it was less, then there is a danger of liquidation to happen soon. |

- In case the account type is physical then the account summary will include the following

Cash: 8,413,432.69 Flt P/L: 87.20 Assets Value: 6,093.96 Credit: 10.00 Equity: 8,419,531.65

| Part | Description |
|--------------|---|
| Cash | Real amount of money a client have in his account |
| Flt P/L | The profit or loss the client gains or loses respectively |
| Assets Value | The total value of the opened position in the current market price |
| Credit | An amount of money put to the account of a certain client in order to be paid later (like a debt) |
| Equity | Cash + Flt P/L + Credit |

- By selecting some/all opened market positions, their Net Information will show up under the account summary in the Trade Panel.
- The option **close selected positions** is used to close more than one position in the same time or all of your open positions together. But this option validate the Maximum Amount Per Deal for each symbol so it will not allow you to close total lots more than the maximum amount per deal.
- The option **Hedge Selected Positions** is used to open hedged position(s) for the selected/all opened position.
- By using the option **cancel selected orders** you can cancel more than one limit/stop order in the same time or all of your pending limit/stop orders together.

- Right-clicking on any position in the Trade tab window, gives you a context menu with options that you can manipulate the position according to which:

| Option | Description |
|------------------------------|---|
| Close /New Order | Opens the one click trading screen, which allows you to close, close by hedge or open a new order on the selected symbol |
| Hedge This Position | To open a hedged position (opposite type) for the selected position with the current market price |
| Manage Position | Open a window that allows you to set a take profit or stop loss for the selected position of the selected account (This options is also found in the Limit/ Stop and SL/ TP orders under the name Edit Order) |
| Close Profitable Positions | To close all opened positions which their profit/loss are in positive value |
| Close Unprofitable Positions | To close all opened positions which their profit/loss are in negative value |
| Attach To Chart | To attach and open the chart window of the selected symbol |
| Report | Opens for you a printable HTML report of all opened positions and opened limit orders at the Trade tab window |
| View Settings | Opens a window that allow you to edit the settings of viewing the trade window |
| Maximize | Maximizes the trade window |

2014-08-14 16:33

USD/CHF testing August lows

The USD/CHF is falling on Thursday and recently bottomed at 0.9033, reaching the lowest price in almost a week. Afterwards bounced to the upside and currently trades at 0.9058, down 0.15% for the day so far.

During the Asian session the USD/CHF failed to hold above 0.9080 and turned to the downside. The decline found support in an important area where August lows lie. If the price falls below 0.9030, it would be trading at levels not seen since July 28.

EUR/CHF drops further

The Swiss Franc is the best performer on Thursday among European currencies and is also rising against the Euro. The EUR/CHF recently fell to 1.2108, 5-month low and it could post the lowest daily close since January 2013.

| | | | | | |
| | | | | | |

Trade (9/2) Net Trade History (2) Journal Mailbox (Phill) **NEW** News **Alerts (Phill)** vStore

- Now by this option you can make warning alert and the system will alarm you when certain symbol reaches your targeted value when press right click a context menu will appear which has the following options:

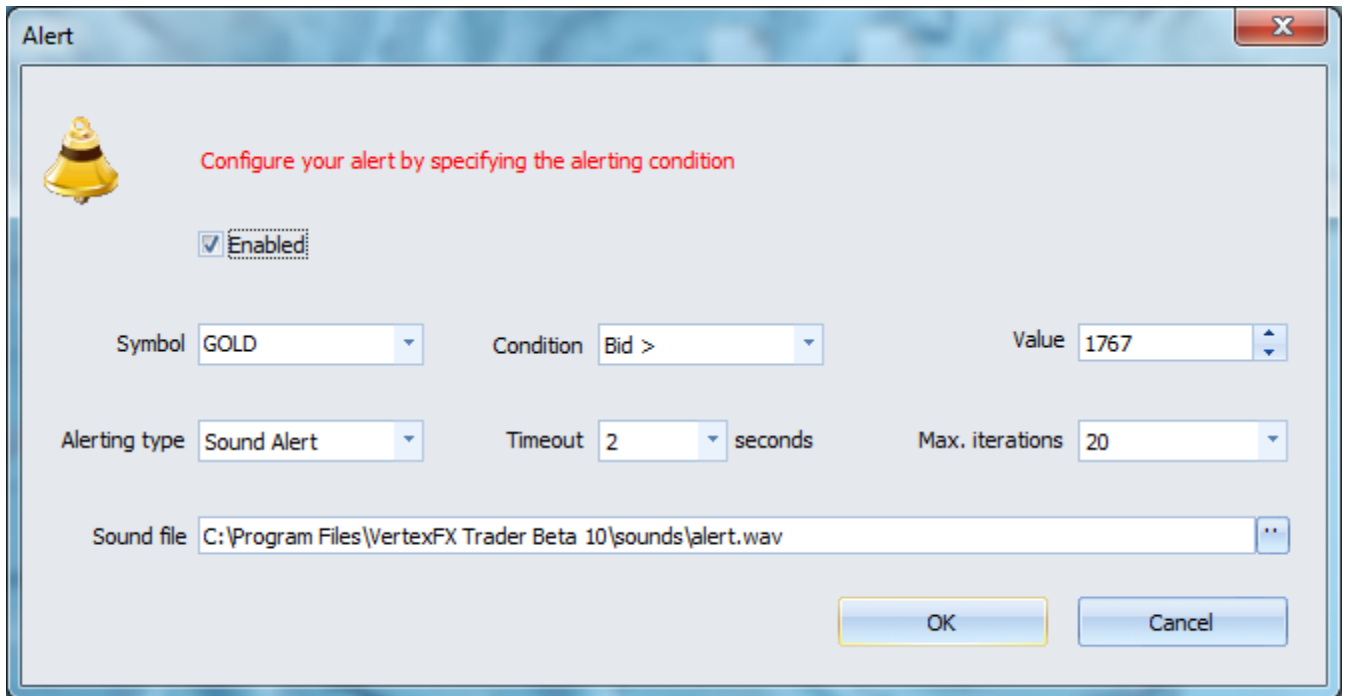

| Option | Description |
|---------------|---|
| New Alert | To set your alert by filling all required information to run this feature |
| Edit Alert | To edit the selected alert by changing any value you have set |
| Delete Alert | To delete the selected alert from your list |
| Enable Alert | To enable the selected alert |
| Disable Alert | To disable the selected alert |
| Reset Alert | To reset the selected alert counter to zero |
| View Settings | To edit the settings of viewing the Alert panel |
| Maximize | Maximizes the Alert panel |

- **New Alert Options:**

| Option | Description |
|----------------|---|
| Enabled | To enable/disable the new alert |
| Symbol | To select the desired symbol for the alert |
| Condition | To select the alert condition (Bid >, Bid <, Ask > or Ask <) |
| Value | To price value of the alert |
| Alert Type | To determine the alert type (Sound or SMS alert) |
| Timeout | The time between every alarm sound |
| Max Iterations | The maximum number for repeating the sound |
| Sound File | Here you can change your sound by fill the whole path for that desired sound file |

- **Example:**
The following example is made on the Gold spot when the bid price reach more than 1767. For sure I should "Enable" the alert first.

Alert

Configure your alert by specifying the alerting condition

Enabled

Symbol GOLD Condition Bid > Value 1767

Alerting type Sound Alert Timeout 2 seconds Max. iterations 20

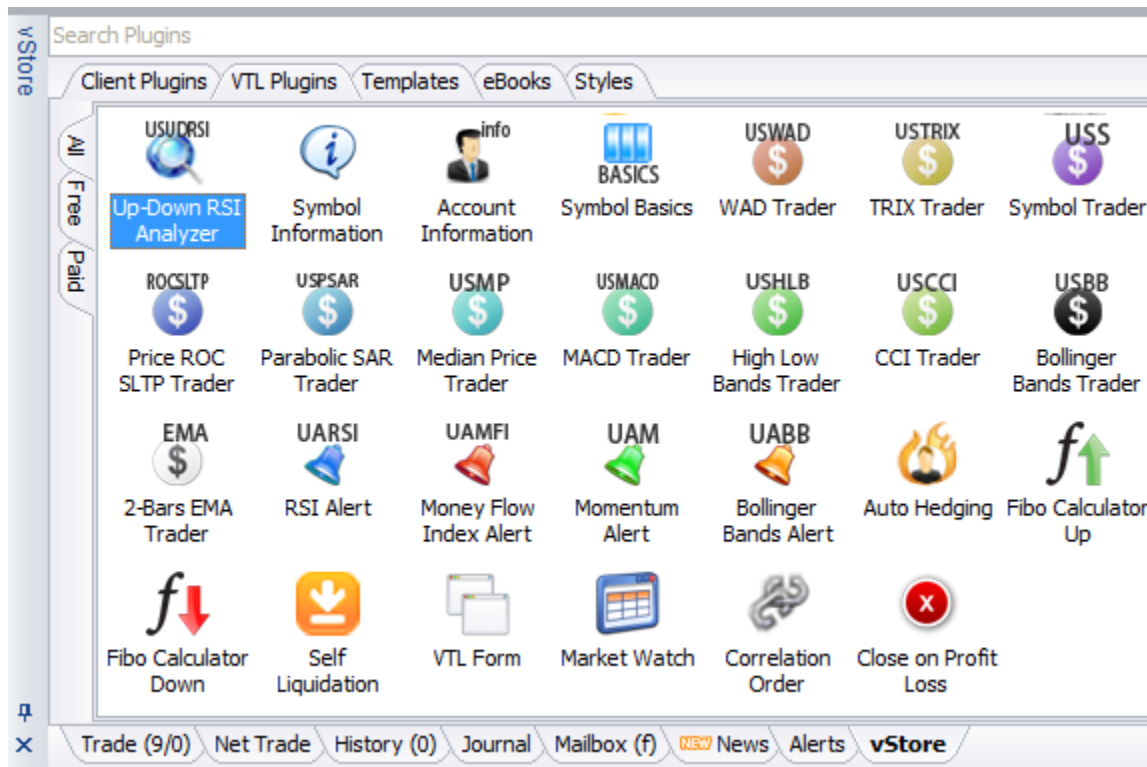

Sound file C:\Program Files\VertexFX Trader Beta 10\sounds\alert.wav

OK Cancel

After you set all the blanks and press ok the alert will be place in the Alert Panel and the counter will be by default zero. And when the alert hit the counter will be increased every time the alert will hit the set price value.

Sliding News Bars

Two banners in the bottom of the platform were built to deliver two classes of news, Public and Private:

- The Public News Banner, used for public dealing room news for all clients.
 - The Private News Banner, used for clients' private news, appears under the Public News Banner.
-

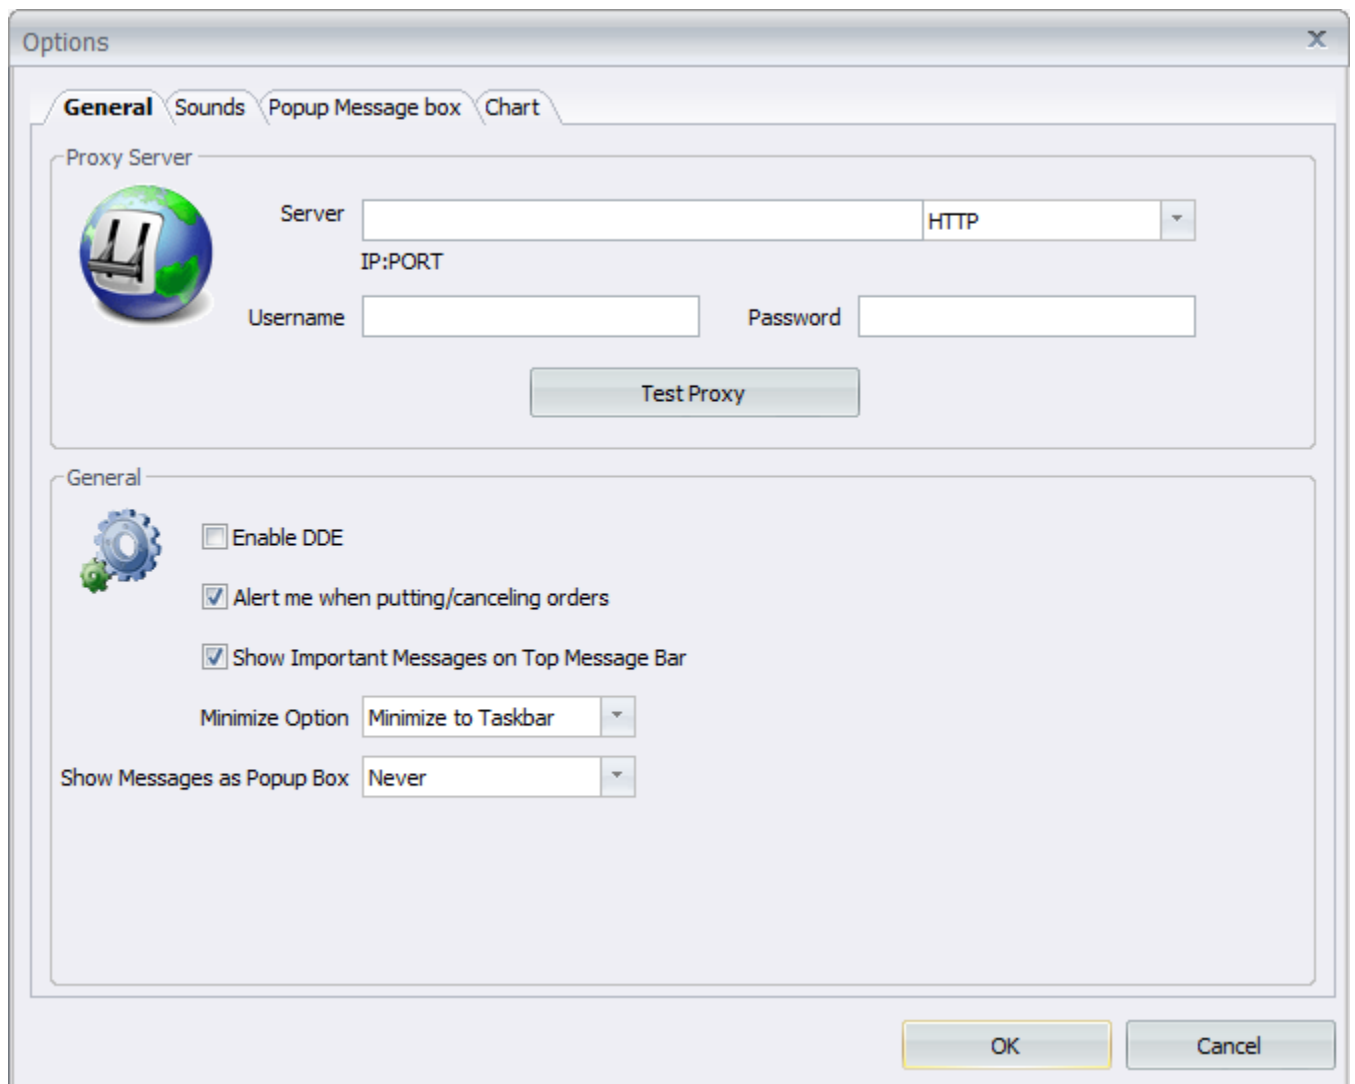

[Back to Help Index](#)

System Options

When you open the System Options the options window of the platform will open which contains four tabs as following:

1- General

The screenshot shows the 'Options' dialog box with the 'General' tab selected. The dialog has four tabs: 'General', 'Sounds', 'Popup Message box', and 'Chart'. The 'General' tab is divided into two sections: 'Proxy Server' and 'General'. The 'Proxy Server' section includes a 'Server' field with a dropdown menu set to 'HTTP', an 'IP:PORT' label, a 'Username' field, and a 'Password' field. A 'Test Proxy' button is located below these fields. The 'General' section includes a 'General' icon, a checkbox for 'Enable DDE' (unchecked), a checked checkbox for 'Alert me when putting/canceling orders', a checked checkbox for 'Show Important Messages on Top Message Bar', a 'Minimize Option' dropdown menu set to 'Minimize to Taskbar', and a 'Show Messages as Popup Box' dropdown menu set to 'Never'. At the bottom right of the dialog are 'OK' and 'Cancel' buttons.

The General tab contains two parts (Proxy Server, General).

- **Proxy Server**

This option will allow you to connect through proxy server by filling the following fields with correct data:

1- Server: fill the IP address you want to connect to and port number you want to

connect through.

2- Proxy Type: fill the type of proxy that you want to connect through (HTTP, SOCKS4, or SOCKS5).

3- Username & Password: fill username and Password for proxy server you connect through if exists.

4- Test Proxy: Use this option to check if you can connect through the proxy you fill its information above.

- **General**

Contains five options:

1- Enable DDE: By enabling this option you can use the client terminal DDE links and export the prices of the market watch to excel sheet.

2- Alert me when putting/canceling orders: By this option you will be able to Set/ Cancel a limit order without any alert.

3- Show Important Messages on Top Message Bar.

4- Minimize Option: You can choose the type of minimizing the platform either to Taskbar or to Tray.

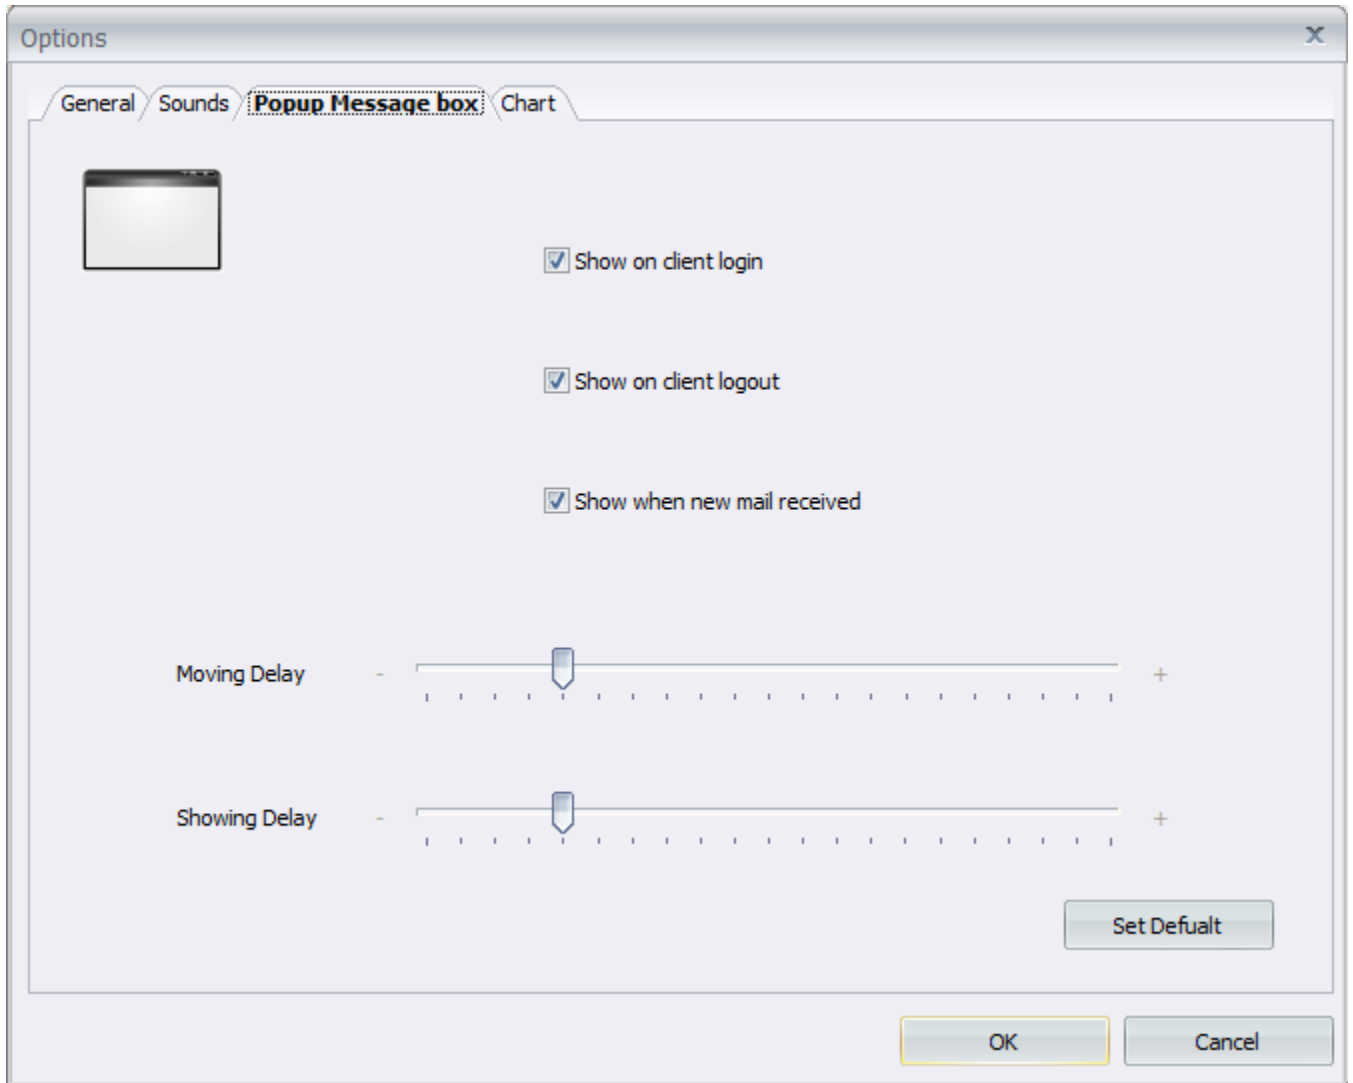

5- Show Messages as Popup Box: To control the visibility of the Popup Box messages.

2- Sounds

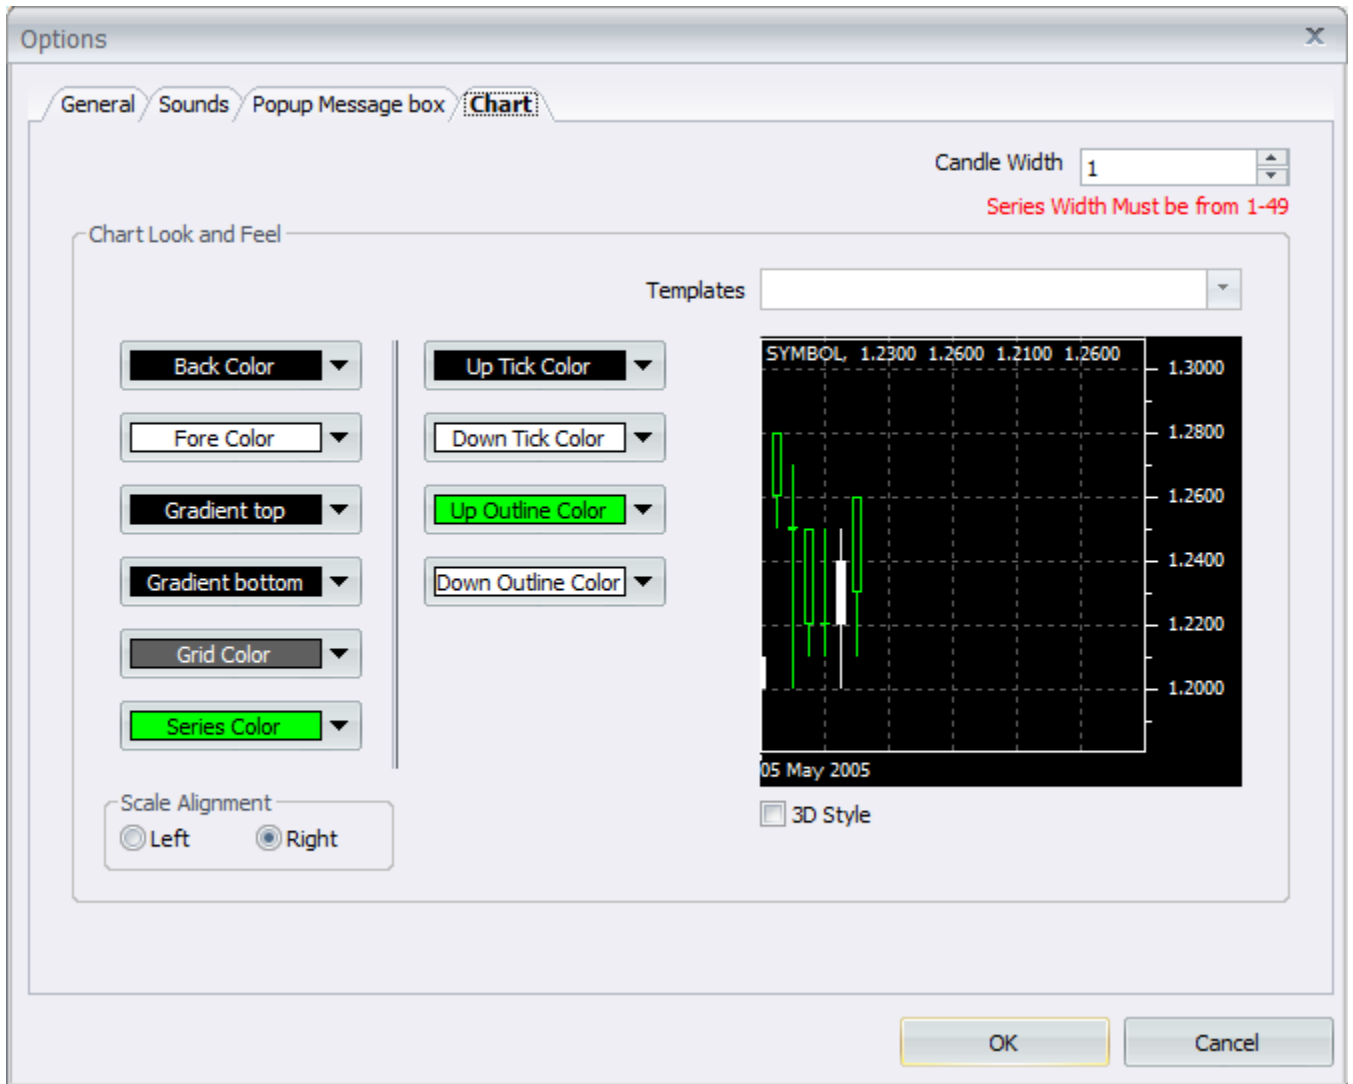

- This is the list of all default sounds of the platform. You can test, edit or remove each sound by right click on any sound and choose the desired option.

3- Popup Message Box

- From this tab you can show or hide the popup message box when the client login/logout or when you receive a new mail. Also you can control the moving and showing delay of the popup message box.

4- Chart

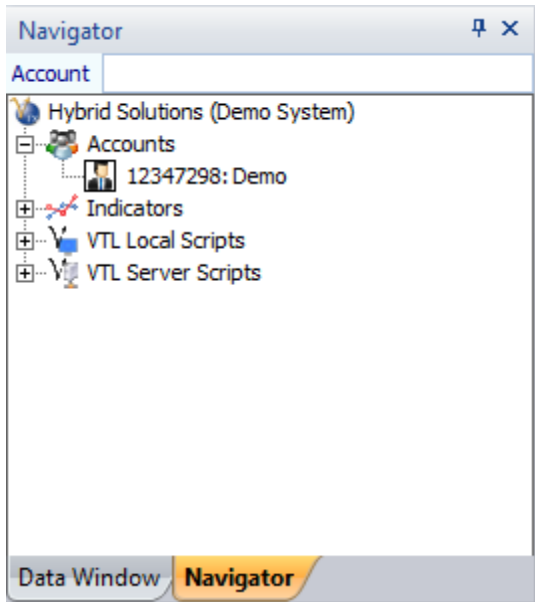

- From this tab you can edit all the settings and colors of viewing the chart window.

COMMODITY FUTURES TRADING COMMISSION DISCLAIMER

"Hypothetical performance results have many inherent limitations, some of which are described below. No representation is being made that any account will or is likely to achieve profits or losses similar to those shown. In fact, there are frequently sharp differences between hypothetical performance results and the actual results subsequently achieved by any particular trading program. One of the limitations of hypothetical performance results is that they are generally prepared with the benefit of hindsight. In addition, hypothetical trading does not involve financial risk, and no hypothetical trading record can completely account for the impact of financial risk in actual trading, for example, the ability to withstand losses or to adhere to a particular trading program in spite of trading losses are material points which can also adversely affect actual trading results. There are numerous other factors related to the markets in general or to the implementation of any specific trading program which cannot be fully accounted for in the preparation of hypothetical performance results and all of which can adversely affect actual trading results."

- If you are trying to place an order and you get the following message (Trading is closed), this message means that the market is closed and you will not be able to trade on the selected symbol till the market opens.

- Sometime when you place a Limit/ Stop order an alerting message appear (Invalid Price). This message appears when you set a Limit/ Stop order with offset close to the current market price, so you will need to increase your order offset to place your Limit/ Stop order.

- The following message (Unable to get a quote on this symbol due to market conditions) will appear to you if the rates of the selected symbol stopped for a certain seconds, so you will not be able to trade on the selected symbol till it's rates start to move again.

- While you are using the VertexFX system you must be sure that your internet connection is good, because if you have any issue in the internet connection and you are trying to place any order on the symbols, you will get this message (Unable to get a quote due to bad connection, please try again).

- If you placed an limit/ stop order it will be in the pending order till it's price hit, and when this order hit it will be showing in red bold color in the trade

panel, but if after the hit you tried to delete this order a message as the following appears to him since the order is hit.

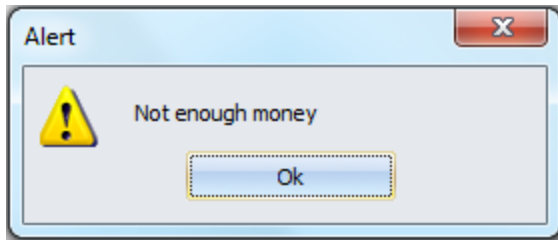

- If you tried to close a market order and then this order will be in the pending mode, and then tried to cancel this market order from the pending orders, the message (You can not cancel market orders) appears to you. So you will need to wait till the dealing room takes an action in this order.

- If you tried to close a market order and then this order will be in the pending mode, and then tried to close this market order again from the trade window, the message (Position is in pending mode) appears to you. So you will need to wait till the dealing room takes an action in this order.

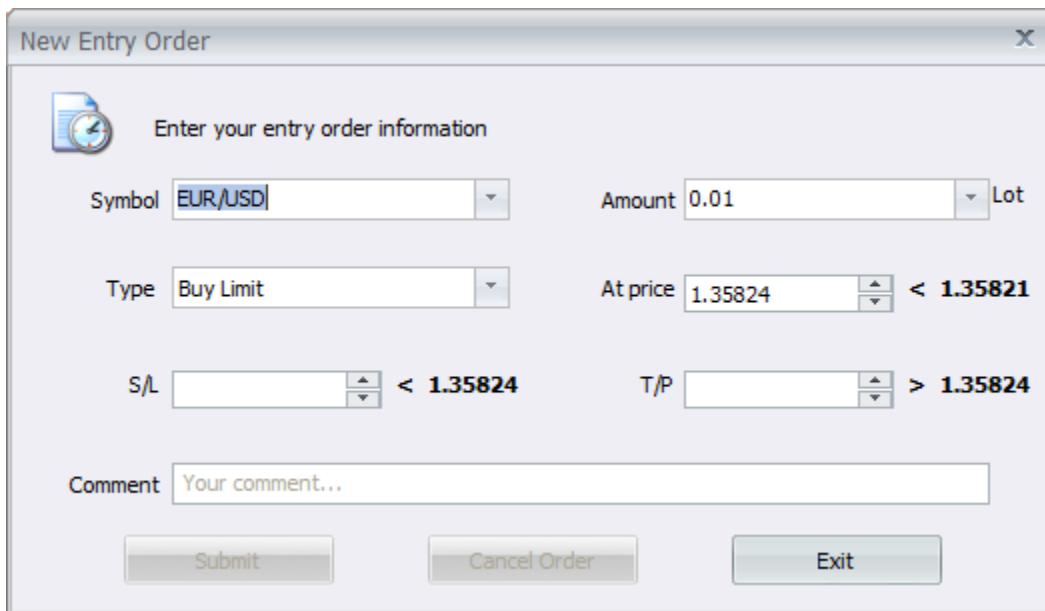

- This message "Not Enough Money" may appear to your clients while they are trading, and there are two ways that will let this message to show up:
 - The first way is if your want to open a new position on a certain symbol and your equity is less than the initial margin per lot of this symbol.
 - The second way is if you tried to close one of the two hedge positions you got, while your equity is less than the initial margin per lot of this symbol.

2- New Entry Order

- When you choose this option a window will open for you as the following image, and you will be able to set a Limit/ Stop order with the inserted information (Symbol name, Amount, Order Type, At Which Price, Stop loss or take Profit) and after you fill all the desired information press on the Submit button so your order will be placed.

A "New Entry Order" dialog box with a clock icon and the text "Enter your entry order information". It contains several input fields: "Symbol" with a dropdown menu showing "EUR,USD"; "Amount" with a dropdown menu showing "0.01" and "Lot" next to it; "Type" with a dropdown menu showing "Buy Limit"; "At price" with a numeric input field showing "1,35824" and a dropdown menu showing "< 1.35821"; "S/L" with a numeric input field showing "< 1.35824"; and "T/P" with a numeric input field showing "> 1.35824". There is also a "Comment" text area with the placeholder "Your comment...". At the bottom, there are three buttons: "Submit", "Cancel Order", and "Exit".
